## Education

### National University of the Altiplano

Systems Engineering

2018 II – 2023 // Perú

- Final project of the ninth semester, I developed along with three colleagues a web application for record management in the subunit of the Escalafón office at UNAP, using Laravel 9, Livewire, Tailwind CSS, and MySQL.

## Interesting Project

### Code Xplain

*Typescript, TailwindCss, crxjs*

- Developed Codexplain, a Chrome extension to obtain detailed explanations of selected code on a web page.
- Utilizes OpenAI's API to provide explanations.
- Enables users to select code and receive relevant information in a pop-up window.

### Commit Genius

*Nextjs, Typescript, Chakra-ui, Valtio*

- Generate commits with good practices based on the Linux repository.
- Simple interface for entering verb, object, and commit description.
- Automatically generates a structured and readable commit message.
- Option to copy the generated commit message to the clipboard.

### Other Projects

## Skills

#### Programming Language

TypeScript (specialized), Js, PHP, C++, SQL.

#### Libraries & Frameworks

React (specialized), Tailwind-Css, Chakraui, Nextjs.

#### Tools Platform

Git, MongoDB, Nodejs, SQL (MySQL, PostgreSQL).

## Languages

**Spanish:** Native

**English:** Intermediate reading, basic speaking
